

designer wash troughs

Beautifully crafted solid surface wash troughs designed for high end washrooms and superloos

CIS CRAWFORD
INTEGRATED SYSTEMS

designer wash troughs

It's all in the detailing, from the base of the trough subtly sloping towards the inconspicuous drainage slots at the rear through to the thoughtfully designed removable stainless steel waste box housing the overflow our designer troughs have been designed to be both practical and visually stunning.

All our designer troughs are made to measure to fit your washroom perfectly, whether you require a floating unit seemingly not touching the surrounding walls or with cupboard units underneath that conceal waste bins we have the solution to your needs.

We can even offer you a smaller version suitable for the ultra-modern and popular super loo layout.

Details
